

LANTEC

Modern System
Integrator

About us

LANTEC has been integrating computer systems and software into unified information solutions for 23 years

Our goal is to combine different components, making them interacting and compatible with each other.

70+
Specialists

520+
Certificates

24/7
Support

23+ years
of experience

LANTEC is a leader in hardware and system servicing in Ukraine.

Mission

We provide Ukrainian companies and organizations with top-notch IT solutions

In reliable partnerships with the strongest brands, we are confident that we will make the world more convenient and efficient through cutting-edge technologies.

Values

Technologies

We offer only modern solutions that are relevant today.

Professionalism

Every year, our specialists validate their qualifications with international certifications.

Support

We stand by our clients and provide 24/7 support to ensure their success.

Hybrid IT Solutions

LANTEC – Hewlett Packard Enterprise Solutions Integrator

HPE Platinum Partner

HPE expertise

HPE Platinum Partner 2023

Design and implementation of data centers of any scale

High-performance server systems: HPE ProLiant, Synergy, Superdome Flex.

HPE data storage systems: Alletra, Primera, XP8, Nimble, MSA, StoreEasy.

Fast and efficient data backup and recovery systems: HPE StoreOnce.

Modular and mobile data centers – HPE POD of various capacities.

HPE expertise

Detailed analysis of infrastructure and customer's needs

Development of solution architecture based on HPE equipment for any tasks.

Supply of HPE equipment on order or from stock, in Ukraine and EU.

Modernization of existing HPE infrastructure.

Design and construction of file or object storage solutions: Scality, Qumulo, Parallel FS.

Building hyperconverged solutions in on-premises and cloud infrastructures: VMware vSAN, HPE Alletra dHCI, Nutanix, HPE SimpliVity, Microsoft S2D or Azure Stack HCI.

Aruba expertise

HPE Aruba Gold Partner 2023

Integrated solutions for network management

ArubaOS-CX

Aruba switches based on ArubaOS-CX are modern solutions with flexible modular architecture, built-in analytics, programming, and automation capabilities, providing a comprehensive solution for all network levels, including access and data centers, without the need to purchase licenses or subscriptions for software.

Aruba Central

Cloud-based network management system powered by artificial intelligence that simplifies IT operations, increases flexibility, and reduces costs through unified management of the entire network infrastructure.

Aruba WiFi

Provides seamless connectivity, security, reliability, and performance for hybrid workplaces, Internet of Things (IoT) devices, and growing user expectations. It also supports Wi-Fi 6 and Wi-Fi 6E technologies, providing higher speeds, lower latency, increased capacity, and improved energy efficiency for wireless devices.

Aruba expertise

HPE Aruba Gold Partner 2023

Security and geolocation solutions

Aruba ClearPass

Network access control solution that provides device visibility, access policy management, workflow automation, and attack response for wired and wireless networks from multiple vendors.

Aruba Meridian

Cloud-based solution that enables the use of location-based applications for mobile engagement and asset tracking. This allows establishments to create and manage internal turn-by-turn routes, proximity-based notifications, and digital asset tracking through a simple and intuitive web interface.

Microsoft CSP Direct Bill Partner

Cloud Solutions

LANTEC – Microsoft Cloud Solutions Integrator

We specialize in integrating solutions based on Microsoft software products and services.

Microsoft CSP Direct Bill Partner

Microsoft Gold status

Microsoft Silver status

Microsoft expertise

Microsoft CSP Direct Bill Partner

Implementation of the best solutions into your business

Migration of customer servers (physical/ virtualized) from on-premises data centers to Azure.

On-premises mail services and other services migrating to Microsoft 365 (Exchange Online, Teams, SharePoint Online).

Building disaster recovery scenarios using Azure Site Recovery services.

Developing innovative next-generation AI solutions that transform everyone's life.

Developing and implementing telephony solutions based on Microsoft Teams.

Building processes based on Azure VMware Solution for smooth migration of workloads from on-premises data centers to Azure.

Designing and implementing cloud solutions for virtualization of Windows desktops and applications (VDI and AVD).

Designing and implementing Azure Backup solutions.

Microsoft expertise

Microsoft CSP Direct Bill Partner

Consulting and Selection of appropriate Microsoft services

Assessment services and POC implementation.
Risk assessment, secure cloud infrastructure creation,
and building secure cloud operations, Zero Trust Concept.

Performing failover tests for functionality verification.

Providing the first level of support for Microsoft products
and the possibility of escalation to Advanced Support
Microsoft.

Training for customers on Microsoft services and solutions.

Support & services

LANTEC provides constant technical support and professional services to our customers

HPE Gold Services Specialization

Microsoft First Line Support

HPE Service Delivery partner

Service partner

Technical Support for HPE / HPE ARUBA / Microsoft

24/7 first-line support integrated into HPE and Microsoft support systems.

Our engineers are certified experts with many years of experience.

Full incident lifecycle support.

Warranty and post-warranty support.

Consultations on operation of any equipment (network, server, disk arrays, etc.).

Qualified advisory assistance for hybrid system implementation and cloud migration.

Support for both terrestrial and cloud products.

Professional services by LANTEC

Containerization on platforms:
OpenShift, VMware Tanzu, Kubernetes.

Migration of databases from RISC systems IBM
Power and HPE Itanium to x86.

Design and construction of DWH on-premises and in
the cloud.

Development and implementation of **SmartCity**
projects.

Support, tuning and migrations: Oracle, MySQL,
PostgreSQL, MongoDB.

Deployment and configuration of **Micro Focus**
ArcSight and **Micro Focus SMAX**.

Building and development of BigData Systems based
on **Micro Focus IDOL**.

Consolidation of business analytics with Power BI.

ULA

**Unified
Analytical
System ULA**

Innovative development by LANTEC

Analytics powered by Artificial intelligence (AI), Machine Learning (ML), Natural Language Processing (NLP), Computer Vision (CV).

This software helps to quickly and efficiently gather, evaluate, and analyze information from various sources such as video, audio, images, texts, internet data, and use it for making informed decisions.

ULA Video analytics capabilities

Automated control over thousands of video surveillance cameras simultaneously and a combination of data on various video analytics parameters: ANPR, Face Detect, Face Recognition, Scene Analysis and others.

Integration with any video surveillance systems without being tied to specific manufacturers of video equipment.

Flexible infrastructure construction of the solution through a distributed two-tier system of data collection and processing.

Automated detection of any incidents, enabling prevention of their consequences.

Development of customer-specific business cases.

ULA Media analytics capabilities

Media space monitoring for tracking fake news, trends, societal sentiments, and incident prevention.

Fast and efficient collection, evaluation, and analysis of information from various sources such as video, audio, scanned documents, text documents, databases, and internet data for making informed decisions.

Context classification, participant identification, location tracking, and automatic cataloging and archiving of historical data.

Use as an assistant in situational centers of any complexity and unlimited scalability, allowing customization of the system to meet the specific needs of the customer.

We are trusted by

Banks

OTP Bank, RWS Bank, PrivatBank, MTB Bank, Bank Pivdenny.
